

Sophos security services from O₂

Simple. Affordable. Secure.

No business can afford the cost or disruption that comes with successful cyber attacks. Especially under stringent data protection laws.

Sophos security services helps secure your company data and protect your business from cyber attacks. It's a pay-per-user suite of eleven services that you can pick and choose from. All administered from a single portal.

No hassle. No hidden costs. Just robust cybersecurity for your business.

What happens when a device is lost or stolen?

Malicious apps. Rogue wifi hotspots. These are just some of the ways your data can fall into the wrong hands. Sophos security services gives you advanced protection and full control over every device.

Could your people spot a phishing email?

Email is one of the most common ways for cyber criminals to break in. Sophos security services provide the strongest protection against email threats like phishing.

How long before you know you've been hacked?

Cyber attackers are becoming stealthier and more sophisticated. Sophos security services gives you advanced protection against the latest forms of attack.

What are the added benefits?

We get that you don't always have the time, the resources or the latest information to keep everything protected as you grow. With Sophos security service, we'll help you do four things effectively:

1. Defend your business against ever-changing threats
2. Protect your revenues by preventing downtime or regulatory fines
3. Enhance your reputation as a trustworthy choice for customers
4. Grow your business knowing that your people, data and assets are safe

Sophos security services protect you from the impact of cyber attacks in three ways:

	“What do I get?”	“How will it help my business?”
<p>#1</p> <p>Mobile security and control</p>	<p>An all-in-one way to protect and control your mobile devices, people and data.</p>	<ul style="list-style-type: none"> • Productivity – keeps everyone’s device safe while allowing them to get on with their jobs. • Security – stops malicious apps and rogue wifi networks undermining your device security. • Compliance – safeguards your customer data as well as your own, knowing you can trace, lock and wipe lost or stolen devices.
<p>#2</p> <p>PC, laptop and server security</p>	<p>A simpler way to keep PCs, laptops and servers safe from ransomware and advanced cyber threats – plus the chance to add Endpoint Detection and Response (EDR) too.</p>	<ul style="list-style-type: none"> • Protection – best-in-class security against the latest threats as proven in independent tests. • Productivity – enforces web usage rules and data policies for your people – whether on or off the company network. • Recovery – removes all traces of malware from your systems. • Insight – EDR is like having your own security expert, with security posture reporting and quick responses to attacks.
<p>#3</p> <p>Email security</p>	<p>Essential tools in the fight against advanced cyber criminals that lets you use email with complete confidence.</p>	<ul style="list-style-type: none"> • Stronger security – advanced detection technology prevents even the most sophisticated malware. • Office 365 compatibility – provides extra security for core Microsoft productivity tools. • No disruption – an emergency inbox means you and your people can keep working even if your cloud email service goes down. • Customisable phishing training – quick and easy set-up for phishing attack simulations with reporting and follow-up training to help prevent future phishing attacks.

Select the services that suit you

<p>Sophos Device Encryption</p> <p>Protects data in case computers are lost or stolen by centrally managing full disk encryption.</p>	<p>Sophos PhishThreat</p> <p>Trains your team to spot phishing emails with simulated phishing campaigns.</p>
<p>Sophos Endpoint Advanced</p> <p>Protects PCs and laptops from cyber threats, secures data and enforces web usage policies.</p>	<p>Sophos Server Protection</p> <p>Protects virtual and physical servers from cyber threats.</p>
