

The O₂ Health Tariff

A great deal for the people who care

Good healthcare should be available to all, regardless of wealth – a founding principle of our NHS. O₂ believes that the people providing exceptional care deserve the connectivity they need to be their best. And we're committed to delivering it at an accessible price. That's why we've developed the **O₂ Health Tariff**.

What is it?

A unique connectivity package exclusively for health organisations such as the NHS.

What are the benefits?

More time to care: Health professionals can securely access the information they need, wherever they are. Anytime access to the patient management and clinical systems takes the hassle out of admin. And that means more time for what really matters: caring.

Better communication: Our solutions make it easier for people on the ground and people in the office to securely stay in touch and share information. It saves time and money, gives healthcare professionals faster access to the information they need to make critical decisions and improve patient outcomes.

Happy people: Effective communication supports flexible, efficient working and promotes work-life balance. Your people feel respected, they shine in the community and get that warm feeling that comes from making a difference.

Peace of mind: You can be confident that patient-critical data is in safe and secure hands. We were the first network to obtain government CAS(T) approval, and we remain the most secure.

Control costs: Our solution means you can get more from your tight budget, and you get the device and SIM visibility you need to control costs.

What's the deal?

- The equivalent of £12 per month per user²

What's included?

- Unlimited calls and texts
- 2GB data per user per month: this can be shared between users (so if one person only uses 1GB another can use 3GB)
- Five days of project management support, to oversee the process of getting your users connected and secure
- Award-winning network³
- End-to-end security and device management made easy:
 - Mobile Device Management: your organisation's devices will be centrally controlled, configured, managed and reported on
 - SIM management: securely control how your data is used, not just your devices
 - Intrusion protection software: help protect your data and devices from cyberattacks
- Online access to O₂ Gurus: there to answer all the questions your people might have

What's not?

- Devices: we'll let you know in advance about any extra time needed to set your devices up and any training required, work with you to get things running and, if there's a problem, we swap them
- Any additional implementation costs beyond the five days of project management support. Costs for this will vary depending on your needs

Any small print?

- You need a minimum of 500 connections to qualify

1. <https://www.longtermplan.nhs.uk/>

2. Excluding VAT. Subject to minimum quantity and restrictions.

3. Winner of 2019 uSwitch **Best Network for Coverage** plus rated most reliable by GWS with 99% 4G coverage (98% indoor).

Why O₂?

O₂ is proud to be working alongside the NHS, and of what we're achieving together. Our solutions have already won our customers the 2019 Most Innovative Secure Mobile Solution.

A trusted and experienced NHS partner

O₂'s dedicated healthcare specialists are already making a difference to the NHS. Whether it's helping to take mental health care to where it's really needed, or introducing game-changing innovations such as anti-bacterial screens, we're committed to adding value from the ground up.

Putting people first

Healthcare is all about people: your people and the people they serve.

We take the time to listen to your people, so we know what they need to be their best. We balance their insights with your priorities, and then we deliver solutions. Our solutions connect workers, give them more time in their day and access to the information they need to deliver the very best care. Our solutions help you to strengthen your organisation and control costs while remaining compliant and secure, giving you peace of mind.

What next?
