# Mobile device enablement. The right tools for the job.

Every device you get from us can be provided with the tools for you to deploy, manage and secure your business-critical devices throughout their lifetime. This wide set of solutions will meet all your needs and cover your business devices every step of the way.

## Ready-to-go

Your devices are set up to work as soon as you get them. There's no need to spend your time on authentication procedures or activations for specific networks. Start working with your new device from the minute it arrives.

## Effortless management

We give you the tools to manage any number of your connected devices at once. Whether that means turning off or controlling specific hardware, access to apps or corporate network functionalities – you can be sure your business devices are being used just how you want.

## Configure remotely

We know one size doesn't fit all. Make your devices fit for purpose by removing the features you don't need and create a customised experience, designed for the job at hand. Take control over network configurations, notifications and even display settings.

## High security

From the moment your device comes out of its box, it's secure. And it's easy to keep it secure by rolling out the latest updates to all your devices, as and when you wish. This helps keep your sensitive data safe and means that you control updates, ensuring they happen when you want.

## Flexible use

As people's needs change, so can their devices. Conveniently switch on and switch off permissions for apps. Save money by giving your people what they need to get the job done, only for as long as they need it.

## Easy to scale

We make it easy for you to enable new devices, so if your business is growing, you won't be held back by a lack of available technology. And your new devices can slot in seamlessly next to your existing ones.

# Award-winning network

---

We won Best Business Network at the 2019 Mobile Industry Awards.

We won Best Network Performance at the Mobile News Awards 2019 and Best Network Coverage in the uSwitch Mobile Awards 2018 and 2019<sup>1</sup>.

## Why O<sub>2</sub>

### Experience

We manage devices all across the world. We've been a leader in mobile-led business for 30 years, and we bring together the complete range of mobility solutions, including devices, applications, security and controls, connectivity and end-to-end management. All designed, delivered and managed in-life by platform experts to make sure everything runs smoothly.

### Security

O<sub>2</sub> is the first network provider to have been awarded the government's CAS(T) certification for both our mobile and WAN networks<sup>2</sup>. It means you can rely on secure connections to your data, wherever it's used.

### Expertise

The global Telefónica network is monitored by a best in-class facility based in Madrid – part of a network of eleven Security Operations Centres distributed worldwide – that showcases our capability as a major global player in security.

## Want to know more?
