

Flex Plan from O₂ Business

With Flex Plan, if things change, you'll have peace of mind knowing your plan changes with you.

It can feel daunting signing up to a fixed 24 month plan. Especially not knowing what your business will look like in two years' time. That's why we're offering you more flexibility than ever with Flex Plan.

We'll work with you to understand how and when you use your data and recommend the most suitable allowance for your team.

Only pay for what you need

There's no need to worry about unexpected data charges even if you exceed your data allowance for two months in a row, helping with budget planning.

Your plan flexes to fit your business

Your data allowance will automatically flex (up or down) so you'll always be on the right tariff for your business¹. That means you don't need to worry about individual spikes, as your high and low users will balance out. If your business changes, your allowance will also grow and shrink with the number of people on your plan.

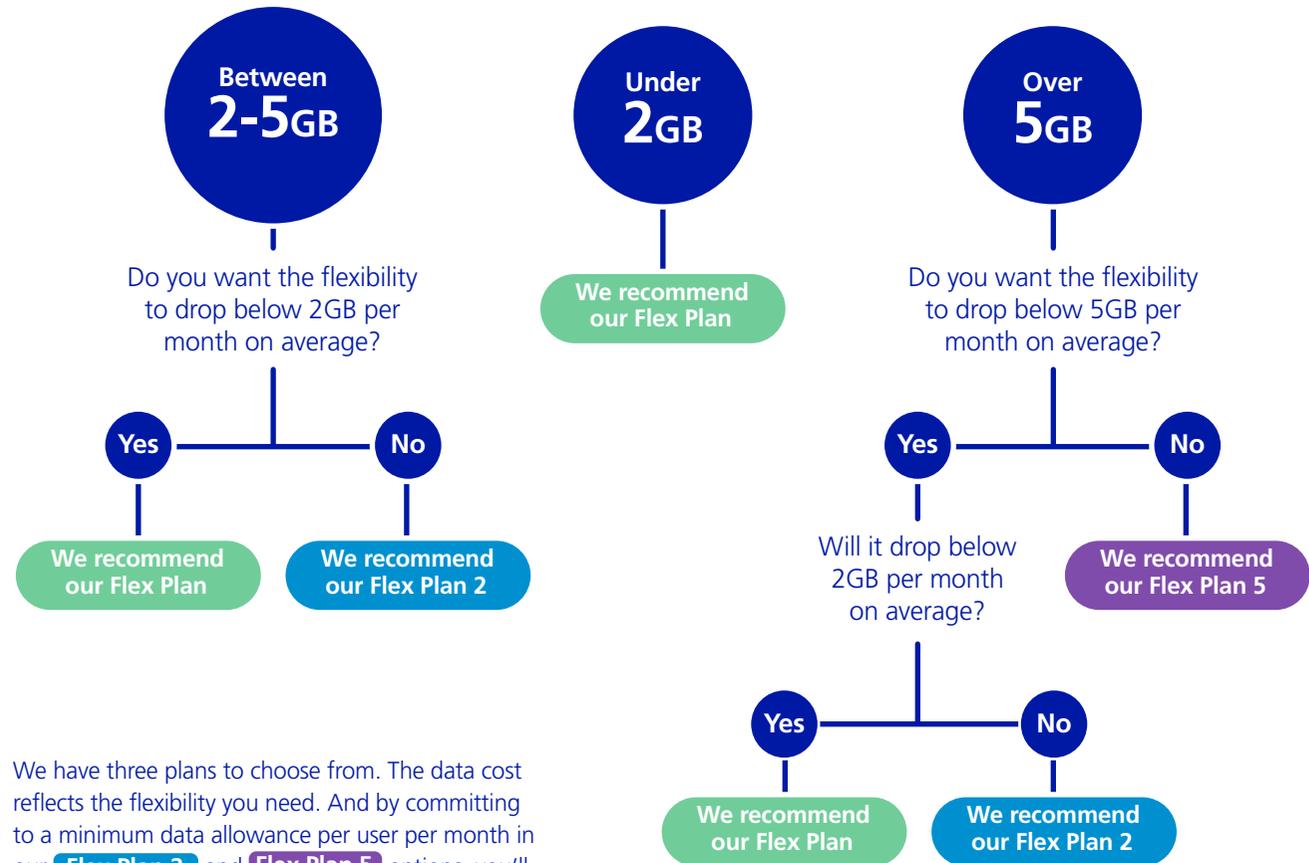

Stay in control

These times are more uncertain than ever and your business needs to be free to adapt, which is why with our new Flex Plans you won't have to wait until the end of your contract to make changes to your data allowance.

And with our online reporting tool, you can get the information you need when you need it, helping you understand your people's usage.

Find out which of our three Flex Plans best suits your business

How much data will you need per person per month?

We have three plans to choose from. The data cost reflects the flexibility you need. And by committing to a minimum data allowance per user per month in our **Flex Plan 2** and **Flex Plan 5** options, you'll pay less per GB than our standard **Flex Plan**.

1. Minimum per user per month data usage applies to all Flex Plans.

What you get with our Flex Plans:

All our plans flex up and down depending on your data usage²:

Flex Plan

Flex Plan gives you the control and flexibility should your needs change during the contract period.

Your data allowance will flex up and down with your changing data usage (to a minimum data allowance per user of 0.5GB).

Flex Plan 2

This is highly recommended if your organisation is regularly using mobile devices. You'll get a better price per GB when you commit to a minimum of 2GB per user per month.

Your plan will continue to flex up and down giving you control and flexibility (to a minimum data allowance per user of 2GB).

Flex Plan 5

Flex Plan 5 is perfect for you if you know you'll have a high usage of mobile data and probably won't often go below 5GB per user per month.

You'll get a better price on the cost per GB. Your plan will continue to flex up and down (to a minimum data allowance per user of 5GB).

Combining your data

By aggregating data from all your users, you'll benefit from a shared data allowance that will grow and shrink with the number of users. The allowance per user will stay the same. And if one person uses a little more one month, it'll even out with those who use a little less.

². Terms apply.

How does it work?

Here's how Flex Plan 2 could work for you if you choose an average of 3GB per user per month at the start of your contract.

Your Flex Plan includes all standard calls and texts in the UK and when roaming in Europe. You'll get notifications via My O2 Business of any changes to your Flex Plan data allowance rates.
