

Five ways you're helping cut carbon with O₂

Since 2008 we've been working to reduce our carbon footprint

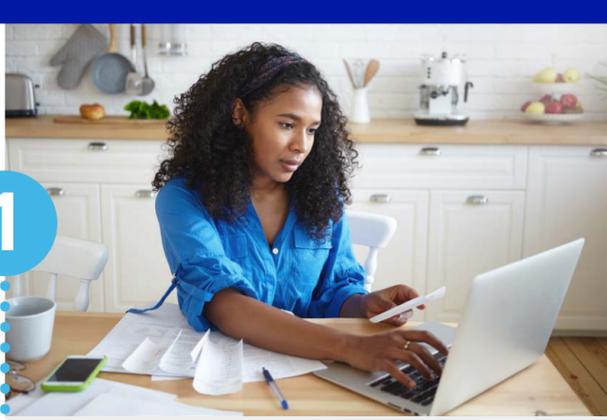

We're on track to be net zero (carbon) in our own operations by 2025¹

Here are five ways you'll be tackling climate change simply by switching to O₂ Business

1.4 million tonnes of carbon

That's how much we helped our customers save through our B2B products and services including flexible working, IOT solutions and cloud-based services.

1

100% renewable electricity

We're reducing CO₂ by buying 100% renewable electricity to power our network².

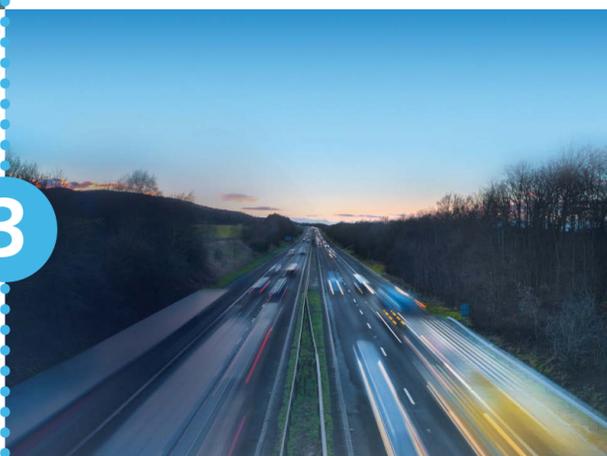

2

82% energy efficiency improvement

Since 2015, we've improved our energy efficiency by 82%, thanks to innovations like our smart network, that powers down when demand is low.

3

3.3 million devices saved from landfill with O₂ Recycle

And we're helping old phones last longer and offering more affordable choices with our second-hand phone initiative 'Like New'.

4

35% reduction

in emissions in our supply chain since 2016³. And we've reduced our carbon emissions in our operation by 29% since 2015.

5

We can't change the planet alone.

But when you switch to O₂, you'll know you've got a partner that takes sustainability seriously.

We're working in partnership with the Carbon Trust to help us on our journey to net zero.

And we're committed to helping UK businesses on the journey to net zero, sharing our approach and learning.

You can calculate the carbon emissions your business could save through flexible working using our Green Savings Calculator.
